

Sets, Kits, And Outfits, For Repair And Refilling Kit For Carbon Dioxide Extinguisher

NSN: 4210-00-828-4447
LIN: R72484

System Description

Engineer Equipment Set: CO2 Repair and Refilling Set provides tools and equipment to refill and repair Carbon Dioxide (CO2) fire extinguishers. The most prevalent type of fire extinguisher in the Army, most units simply throw them away when expended or no longer serviceable. However, in certain situations this is inappropriate, costly, and causes maintenance down time. Components include adaptors, brushes, valve disks, hose expanders, gaskets, hose assembly, recharging unit, reducers, expansion rings, safety release valve assemblies, scale, seals, hose coupling tool kit, and wrenches.

This system is not currently in reset.

Reset Type

Reset Work (Field Level) - Work performed to correct equipment faults that are performed at the ORG/DS level; performed by unit level soldiers, augmented by contractor as required.

Reset Strategy

n/a
